Gardasil-9 (9-valent) HPV Vaccination

\$619.20[^]

HPV vaccine provides safe, effective, and lasting protection against the HPV infections that most commonly cause cancer.

Recommended gender and age:

9 to 45 years old

Protects against HPV subtypes:

6, 11, 16, 18, 31, 33, 45, 52, 58

Prevents up to 90% of pre-cancers/cancers of the cervix

Further 15-20% lowering in risk of pre-cancers/cancers of vulvar, vaginal and anus compared to quadrivalent vaccine.

Prevents up to 90% of genital warts

[^]Gardasil-9 vaccination can only be done at the clinic as Doctor's consultation is required
